Profile

Master's candidate in Artificial Intelligence and Data Science at the University of Antwerp, graduating in 2026. Strong foundation in machine learning, data analysis, and problem-solving, with hands-on experience in developing and evaluating AI models. Particularly interested in computer vision and model optimization, and eager to apply these skills in a full-time role.

Education

Master of Science in Data Science and Artificial Intelligence	Expected Sep 2026
University of Antwerp	
Relevant coursework: Machine Learning, Computer Vision, Data Analysis	
Bachelor of Science in Computer Science (Cum Laude)	2021 – 2024
University of Antwerp	
Secondary Education – Mathematics-Science	2015 – 2021
Sint-Michielscollege Schoten	

Experience

Kitchen & Logistics Assistant – Hof van Schoten	2018 – Present
- Assisted in the preparation and service of meals for a large group of residents, ensuring timely and organized delivery - Maintained strict hygiene and food safety standards in accordance with operational guidelines - Collaborated with nursing and support staff to ensure smooth daily operations and resident satisfaction	

Skills

Programming

- Python, C++

Machine Learning & AI

- PyTorch, deep learning, model training and evaluation
- Computer vision (CAM methods, model optimization)

Data Science

- Data preprocessing, analysis, and visualization

Mathematics

- Linear algebra, probability theory, statistics

Tools

- LaTeX (Overleaf), Git

Projects

Master Thesis – Recommender Systems Evaluation

2025 – Present

- Comparative analysis of recommendation algorithms with a focus on evaluation protocols and reproducibility
- Examined the impact of data preprocessing, hyperparameter tuning, and evaluation metrics on performance
- Identified methodological pitfalls such as selective reporting and unfair benchmarking practices

AI Research Project – WSOL & Model Pruning

2025 – Present

- Implemented Weakly Supervised Object Localization (WSOL) pipelines using deep learning models
- Evaluated CAM-based techniques (Grad-CAM, Score-CAM) using localization metrics (e.g., IoU-based accuracy)
- Applied model pruning strategies to improve efficiency and analyzed trade-offs between performance and model size

Languages

Dutch (Native)

English (Fluent)

Additional Information

- Eligible for full-time work starting September 2026
- Experience combining technical and people-oriented roles
- Interests: AI, data-driven systems, and real-world applications
